DRW = Dual-Rear Wheel. Weights given in kg (lb). Payload and Max Trailer Weights are ESTIMATED values and rounded to the nearest 5 kg (10 lb). Payload = GVWR Base Weight. Payload and Trailer Weight Rating are mutually exclusive. GAWRs, GVWRs and GCWRs should never be exceeded. Trailer Weight Rating and Tow Vehicle Trailering Weight are calculated as specified in SAE J2807 Passenger Weight = 136 kg (300 lb). Options Weight = 45 kg (100 lb). Trailering Equipment Weight: 34 kg (75 lb) for conventional hitch, 32 kg (70 lb) for gooseneck and 113 kg (250 lb) for fifth wheel Tongue weight: 10 percent of the gross trailer weight for a fifth-wheel or gooseneck hitch. Payload and GAWR should never be exceeded and must account for all of the above weights, including the appropriate trailering equipment and tongue weight. Box-Off Body Completion Weight = 36 kg (80 lb) per ft from end of cab to end of frame. The maximum tongue weight for Class V (hitch receiver) is limited to 816 kg (1800 lb). A fifth-wheel or gooseneck hitch is required for trailers over 8165 kg (18,000 lb). The 6260-kg (13,800-lb) GVWR stated for Regular Cab, 4x2, 6.4L V8 with 4.10 axle ratio, applies to Tradesman® Package only. For all other configurations (Regular Cab, 4x2, 6.4L V8 with 4.10 axle ratio), the GVWR is 6214 kg (13,700 lb).
